"I hear it called —  
"The machine with the human-brain;"  
I call it The machine  
with the Super-Human Brain."

Thus spoke the Auditor.

## He was speaking of the Remington Adding and Subtracting Typewriter

(Wahl Adding Mechanism)

This machine does something that only the brain, directing the hand, has hitherto been able to do—that is, *write and add (or subtract) on the same page.*

But this is not all. It does such work *more easily, more rapidly, and more accurately* than the human brain has ever performed similar labor.

Thus the machine is *human* in what it does and *super-human* in the way it does it.
